Design thoughts

The idea is to maintain DHIS2 design layout but adding an extra column. For the very first data obtained from patients, we will only show two columns which means there won't be any changes. However when we look at the patients second visit and onwards we will see three columns.

On the image below we can see numbers and a colored arrow to the right of the middle column. These numbers indicate the difference between data from the last visit and data from the current selected visit. The arrow s direction and color indicates if the number has increased or decreased kind of like stock tables.

Report date			Due date	
2012-12-30			2015-11-20	

Data element	Last visit (2012-11-20)		This visit
ANC Visit	1		2
Weight (g)	1531	▲ 984	2515
BP	31	▲ 22	53
HB	16	▼ 3	13
Tetanus	5th		1st
IPT dose	IPT 3		IPT 3
Fe/Folic	Fe		Fe
TB Status	TB+ not on treatment		TB+ not on treatment
ARVs	AZT/3TC/NVP - 1		AZT/3TC/EFV - 1
CD4 Count	54	▲ 1589	1643
Visit comment (optional) ⓘ	None		Baby is underweight
